

Full Service Partnerships 2024 Legislative Report Addendum

Appendix C: Analytic Tables (Revised)

The following tables have been revised from the original report, Full Service Partnerships 2024 Report to the Legislature, to reflect new age categories where older adults are defined as individuals who are 60+ years of age.

Note: Routine client services information (CSI) data updates may have caused slight increases in overall values in the revised tables compared to those previously reported. This does not affect the overall distribution of Full Service Partnership (FSP) data nor does it alter the findings of the original report.

Notes: Data presents primary and secondary diagnosis codes received by individuals actively enrolled in an FSP between January 1, 2018 and December 31, 2022. * Groups with 10 and under are suppressed for client privacy. Diagnoses are not mutually exclusive and are calculated at the partnership level. Only primary and secondary diagnoses are included. It is possible that a partner may have more than two psychiatric diagnoses. Methodology for determining diagnoses can be found in Appendix A1: Operational Definition and Parameters. †This table was previously titled “CSI Services Received by Age Group and Diagnosis Category” in the original FSP report.
