**Subject:** Public Comment – Record Clarification and Access Considerations

Good morning,

I am submitting this comment to ensure that prior written submissions and participation concerns are accurately reflected in the Commission's administrative record.

This includes documentation of:

- requests for ADA Title II written communication accommodation
- barriers to participation in CARE Court processes
- delayed access to behavioral health services despite prior written notice, including communications submitted in May 2025

These issues relate directly to the Commission's ongoing discussions regarding crisis-continuum planning, caregiver inclusion, and system accountability.

This submission is intended for record preservation purposes and to support continuity of public input regarding access to care and communication standards.

Respectfully,

Dr. Esroruleh T. Mohammad
