COMMUNICATING DATA AND MEASURING OUTCOMES

Community Data Request Form

Riverside County:

*Riverside University Health System – Behavioral Health
& Public Health (RUHS)*

The Measuring and Sharing Outcomes subcommittee's objective is to ensure that data statistics/reports distributed by RUHS are a unified message from our coalition. This subcommittee regularly accepts requests for suicide related data from the coalition's remaining subcommittees, as well as Riverside County residents at large. This is a partnership between RUHS - Behavioral Health and RUHS - Public Health, utilizing statewide and county data to produce county-specific data reports. Statewide and county data publications, can be found at (<https://www.rivcospc.org/data>). RUHS - Public Health's Epidemiology & Program Evaluation department has maintained an online Data Request Form for internal/external partners to request data related to various public health topics. Although the Data Request Form is part of RUHS - Public Health's Epidemiology department, the Measuring & Sharing Outcomes subcommittee created a filtration system to direct all suicide related requests to the subcommittee to provide accurate data with safe, unified messaging from the coalition.
