

Immigrant and Refugee Discussion Questions

CLCC November 10th Meeting

- 1) In round one, the Commission directed staff to contract with five local level organizations to expand advocacy, education, and outreach to their local communities. What recommendations do you have regarding this local level approach?
- 2) What advantages would there be in contracting with a statewide advocacy organization to assist the efforts of local immigrant and refugee organizations?
- 3) Should the Commission award one contract to five specific immigrant and refugee populations or continue to award one contract to an organization within each of the five mental health regions. Is there another approach to consider?
- 4) What should be measured to determine the success of the immigrant and refugee stakeholder contract(s)?
