#### WestEd MHSSA Evaluation Partnership

## **f** About WestEd

The Resilient and Healthy Schools and Communities content area includes all of the conditions for learning, development, and success for school-aged children, youth, and adults. This area includes projects that are often cross-sector, including focus on mental health, health, child welfare, housing, and community safety and well-being.

Our **vision** is that one day, all children, regardless of background, identity, or circumstance will have the opportunities and conditions they need to learn and develop to their fullest potential.
