Describing the Problem of Suicide, June 30, 2021

Support for people at risk for suicide or those supporting people at risk is available by calling the
National Suicide Prevention Lifeline 1-800-273-TALK (8255)

Apoyo y ayuda para personas a riesgo de suicidarse o para las personas que los apoyan está
disponible llamando al **National Suicide Prevention Lifeline 1-888-682-9454**

Welcome!

Please add your county name to your display name and introduce yourself in the chat.

We will share the slides and recording with you.

Rosio Pedroso, MPP

Rosio Pedroso, MPP, Principal of Pedroso Consulting has over 20 years of experience conducting research and evaluation for underrepresented and underserved communities. For the past four years she created content, programs and conducted outreach for California's Mental Health Movement, SanaMente, for Spanish-speaking populations. She has conducted evaluations, needs assessments, primary research, empathy studies, focus groups, and interviews on a variety of topics including K-5 literacy, secondary and postsecondary STEM initiatives for underrepresented groups and first-generation college students. Rosio has developed and conducted trainings on a variety of topics to increase awareness and prevention of suicide, child abuse, and cannabis use to Spanish-speaking communities. She also contributed to strategic planning efforts for suicide prevention and adult education consortiums in California. Rosio has provided technical assistance to county behavioral health agencies as a resource navigator since 2017.

Nicolle Perras, MPH, MA LMFT

Nicolle Perras, MPH, MA, LMFT is a Health Program Analyst with the Los Angeles County Department of Public Health (DPH) and a Licensed Marriage and Family Therapist (LMFT). She has over 20 years of experience working in the field of public health research, program planning and evaluation. For the past 15 years at DPH she has worked on the connections between multiple forms of violence, health impacts of trauma, abuse and violence, and trauma informed care practices and systems change. Ms. Perras works to address mental health, suicide and violence as public health issues, examining them through the perspectives of social determinants of health, health equity and social justice. She has served as the suicide prevention lead for DPH and has been a member of the LA County Suicide Prevention Network since its inception.

Striving for Zero Learning Collaborative

Advance local strategic planning and implementation and alignment with strategic aims, goals and objectives set forth in California's Strategic Plan for Suicide Prevention

Builds on a previous Learning Collaborative offered by the California Mental Health Services Authority

Advancing Strategic Planning for Suicide Prevention in California
Fiscal Years 2018-2020

Outcomes from the Each Mind Matters Learning Collaborative with County Behavioral Health Agencies and their Community Partners

The Suicide Prevention Learning Collaborative was formed in the fall of 2018 to provide Each Mind Matters (CaMHSA) member counties with technical assistance as they embarked on developing or updating a suicide prevention strategic plan and creating or enhancing an existing coalition to inform suicide prevention efforts. The Learning Collaborative promotes sharing of knowledge and experience, and provides resources, information and steps needed to develop a suicide prevention strategic plan.

Strategic Planning Framework

The Learning Collaborative utilized a public health approach to suicide prevention. This approach emphasizes preventing problems from occurring or recurring (not just treating problems that have already occurred); focusing on whole populations rather than individuals; and addressing health disparities and access.

It's been very helpful to have one-on-one support on a monthly basis, including technical assistance, resource sharing and someone to bounce ideas off of. The Learning Collaborative webinars have been helpful and I found the retreat in December 2019 to be very helpful in learning about best practices.
— Toby Cuevin,
Nevada County Public Health

Based on the Steps of Strategic Planning Framework from the Suicide Prevention Resource Center (SPRC).

The Strategic Planning Framework utilized in the Learning Collaborative was informed by the Suicide Prevention Resource Center (SPRC), Key Elements for the Implementation of Comprehensive Community-Based Suicide Prevention by the Action Alliance for Preventing Suicide, and Preventing Suicide: A Technical Package of Policy, Programs and Practices by the Center for Disease Control. It is aligned with California's Strategic Plan for Suicide Prevention (2020-2025): Striving for Zero.

EachMind MATTERS
The Learning Collaborative was designed and implemented by the Each Mind Matters Technical Assistance Team administered by Your Social Marketer, Inc.

Assembly Bill 114 (Chapter 38, Statutes of 2017) directed the Commission to develop a statewide strategic suicide prevention plan. In early 2018, the Commission formed a Suicide Prevention Subcommittee, which included Commissioners Tina Wooton (Chair), Khatera Tamplen, and Mara Madrigal-Weiss.

The Commission adopted Striving for Zero: California's Strategic Plan for Suicide Prevention, 2020-2025 in November 2019.

Striving for Zero

Suicide

The Suicidal Crisis Path Model as a Framework for Understanding Suicide Prevention

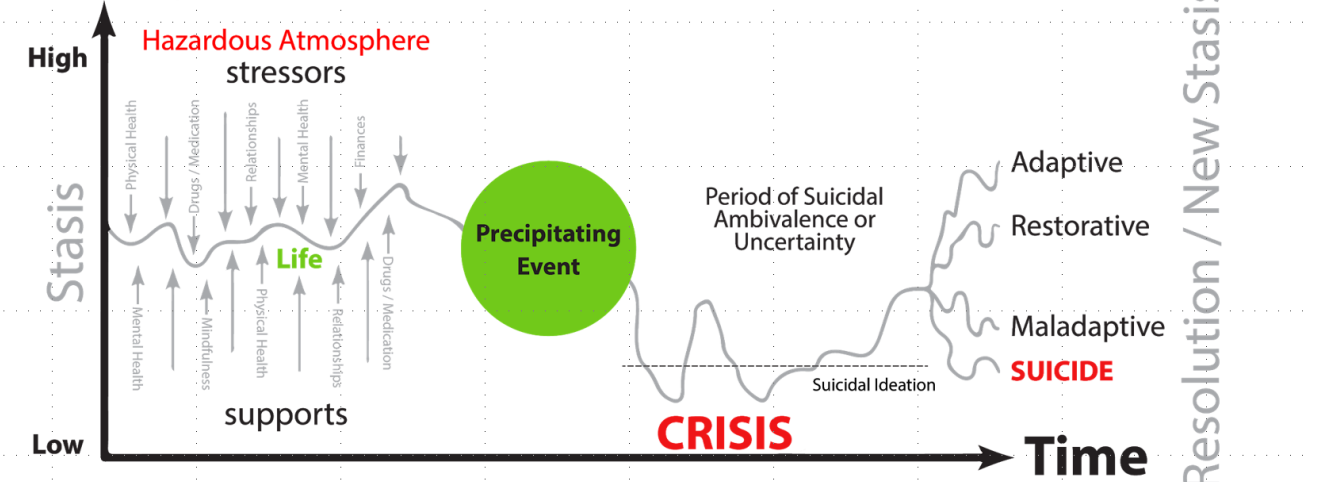

“The Suicidal Crisis Path is a model that intends to integrate multiple theoretical approaches and frameworks within the context of an individual’s suicidal experience. In doing so, the purpose is to match intervention approaches with the timing, risk factors, and protective factors that would be the mechanisms to prevent a suicide from happening.” (Lezine, D.A. & Whitaker, N.J., Fresno County Community-Based Suicide Prevention Strategic Plan, 2018)

Coping

Striving for Zero Learning Collaborative - Data Review Snapshot April 2021 (n 29)

What sources of data are available to help describe the problem of suicide?

What story does your data tell you? Whose story isn't being told?

How are you using and sharing the data?

Why Use Data?

- Provide context to local issue of suicide
- Dispel misconceptions
- Focus effort where the problem is most severe
- Identify risk and protective factors to select interventions
- Persuade funders, policy and decision makers
- Evaluate and measure change over time

A Comprehensive Approach to Suicide Prevention Requires Telling a Comprehensive Story about Suicide and Suicide Prevention in Your County

Who is seeking help by reaching out to a crisis or warm line or accessing services? Who isn't?

Who is thinking about suicide?

What community strengths can support suicide prevention efforts? What are the gaps?

**Who is dying by suicide?
(Mortality Data)**

What risk and protective factors are present?

**Who is attempting suicide?
(Morbidity Data)**

What care transitions exist?

Sources	What it tells you
Coroner or Medical Examiner	Who dies by suicide Means of suicide, risk factors
EpiCenter (CDPH)	State and county Numbers, rates, means, ages and demographics Can create queries
Local hospitals EpiCenter (CDPH)	Non-fatal self injuries treated in hospitals and emergency rooms State and county Non-fatal & fatal injuries by method All ages & demographics Can create queries
CDC WISQARS	Non-fatal self injuries treated in hospitals and emergency rooms State and county Non-fatal self-inflicted injuries & method All ages and demographics Cost of injury reports Can create queries
The Mental Health Services Oversight and Accountability Commission (MHSOAC) Dashboard	COMING SOON!

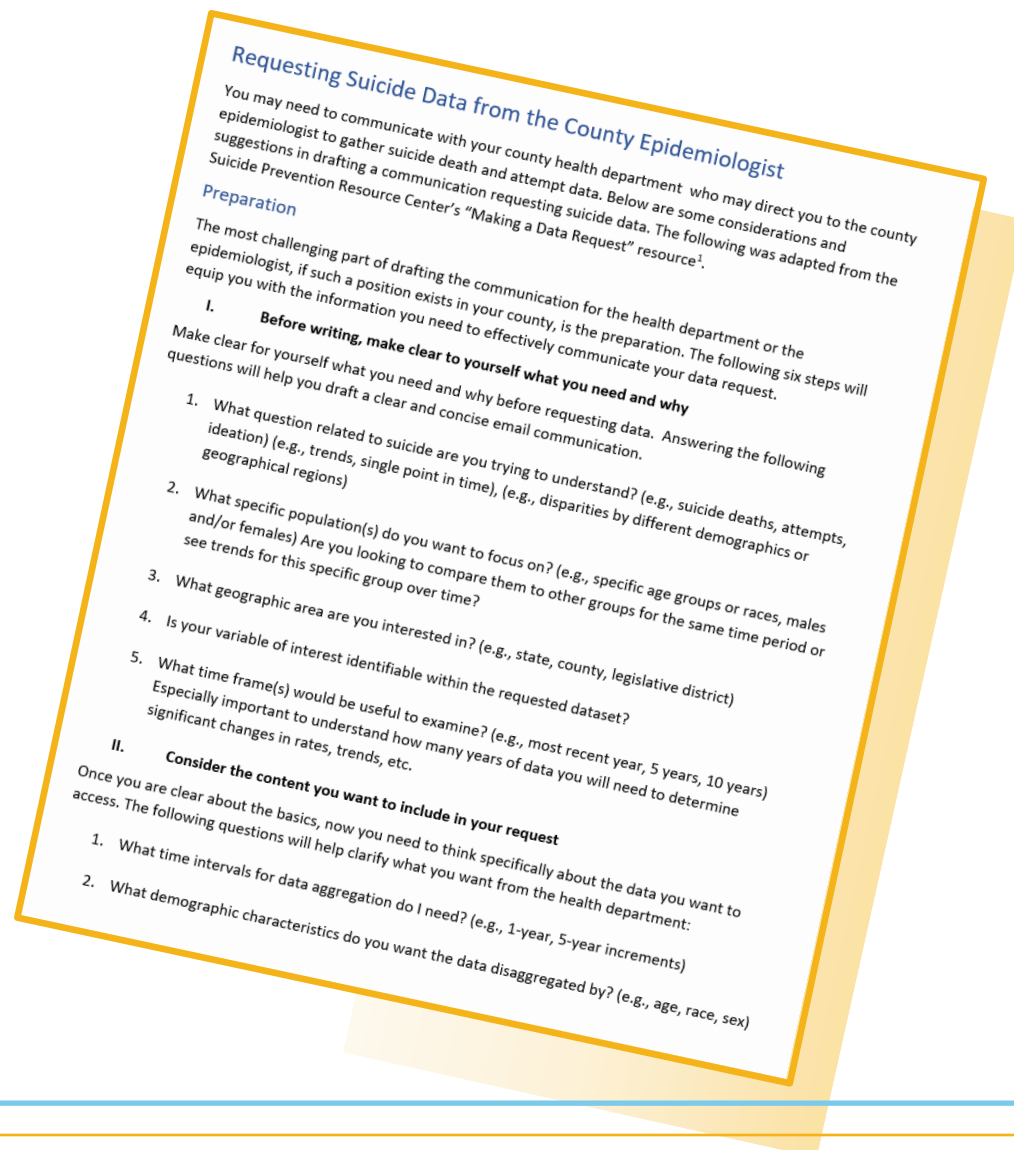

Requesting Suicide Data from Your County Epidemiologist

Be prepared! Outline what you need and why

- ✓ Why you need their data
- ✓ Why they should care
- ✓ What data you would like them to share
- ✓ How you will use their data

Create a table shell of what you need

Be aware of data limitations

Rates of Self-Harm ED Visits by Sex in California, 2016-2019

Source: 2016-2019 ED Visits: Office of Statewide Health Planning and Development (OSHPD), Emergency Department Data; CA Dept. of Finance P-3 Population Projection File (2010-2060)

Summary of Recent Trends

Suicide death rates in California vary by race/ethnicity, age, and sex

Individuals at elevated risk for suicide include:

Whites, American Indians

Older adults (85+)

Males

Most common mechanism of suicide is firearms, and this varies by race/ethnicity, age, and sex

Individuals at elevated risk for using firearms as a mechanism of suicide:

Whites

Older adults (85+)

Males

Self-harm ED visit rates in California also vary by race/ethnicity, age, and sex

Individuals at elevated risk for self-harm ED visits include:

Blacks, American Indians

Youth age 19-24

Females

Have these trends continued into 2020?

Save the date! July 28, 2021 - The CDPH Suicide Prevention Program and Violence Prevention Initiative are hosting a webinar to kick off establishment of the new statewide Office of Suicide Prevention:

Suicide Prevention in CA - Suicide Rates, the Impact of COVID-19 Pandemic, and CDPH's Office of Suicide Prevention

The next slide is a preview of one of the slides that will be presented at the July 28th webinar...

Number of Suicide Deaths that occurred in California, 2011-2020

Source: 2011-2013 deaths: CDPH, Death Statistical Master File (DSMF); 2014-2020 deaths: CDPH, CA Comprehensive Master Death File (CCMDF)

Sharing and Using Data

Striving for Zero Learning Collaborative - Sharing of Data Snapshot April 2021 (n 29)

Tips for Effective Messaging on Suicide Prevention

- ✓ Provide a suicide prevention resource.
- ✓ Educate the audience on warning signs.
- ✓ Avoid discussing details about the method of suicide.
- ✓ Explain complexity of suicide and avoid oversimplifying. It's natural to want to answer the "why" involved in a suicide, but there is usually not one event that is "the cause" of a suicide attempt or death.
- ✓ Focus on prevention and hope by using images and words that show people being supported, not suffering alone.
- ✓ Avoid sensational language and statistics that make suicide seem common overall. Consider data that highlights help-seeking such as number of calls to the local crisis line.

Helpful Resources:

Reporting suicide for the news media www.ReportingOnSuicide.org

Framework for Successful Messaging, National Action Alliance for Suicide Prevention

www.SuicidePreventionMessaging.org

Data Sharing Tips

Words to Consider...

RECOMMENDED terminology

- ✓ Died by suicide
- ✓ Took their own life
- ✓ Ended their life
- ✓ Attempted to end their life

NOT RECOMMENDED terminology

Committed suicide

Note: Use of the word “commit” implies a negative act such as a crime or sin.

Completed suicide

Note: This associates suicide with success.

Successful attempt or unsuccessful/failed attempt

Note: There is no success, or lack of success, when dealing with suicide.

- Rates vs. Percentages
- Words matter: Avoid statements such as “more likely to die by suicide” and instead use language such as “are at disproportionate risk for suicide”.
- Provide context when possible (e.g. compare with population)
- Consider your audience to assess what data to share (and not to share)
- Use data visuals that are easy for the reader to interpret or preferably has the summary point(s) narrated for them
- Be explicit about the data you are presenting, clearly label all data, note time period and identify if talking about rates, numbers or percentages
- Provide a balanced narrative
- Bookend data with messages of prevention and hope; what people can do to prevent suicide

2.3 : 1

Offer Context

Geographic Information

In 2014, the latest year for which suicide attempt data is available, 2,924 Angelenos were treated in the ER for a suicide attempt. Of these, 1,642 (32.7/100,000) were female. The rate was highest for African Americans (47.9/100,000), followed by white (39.6/100,000). Youth were at highest risk for being seen for a suicide attempt: 1,482 were under the age of 25, with the highest rate (90.4/100,000) for young people aged 15 to 19.

Los Angeles County Service Provider Area

The number indicates number of people treated and released for a suicide attempt in the ER. In parenthesis is the rate/100,000 people. Data shown is for 2014.

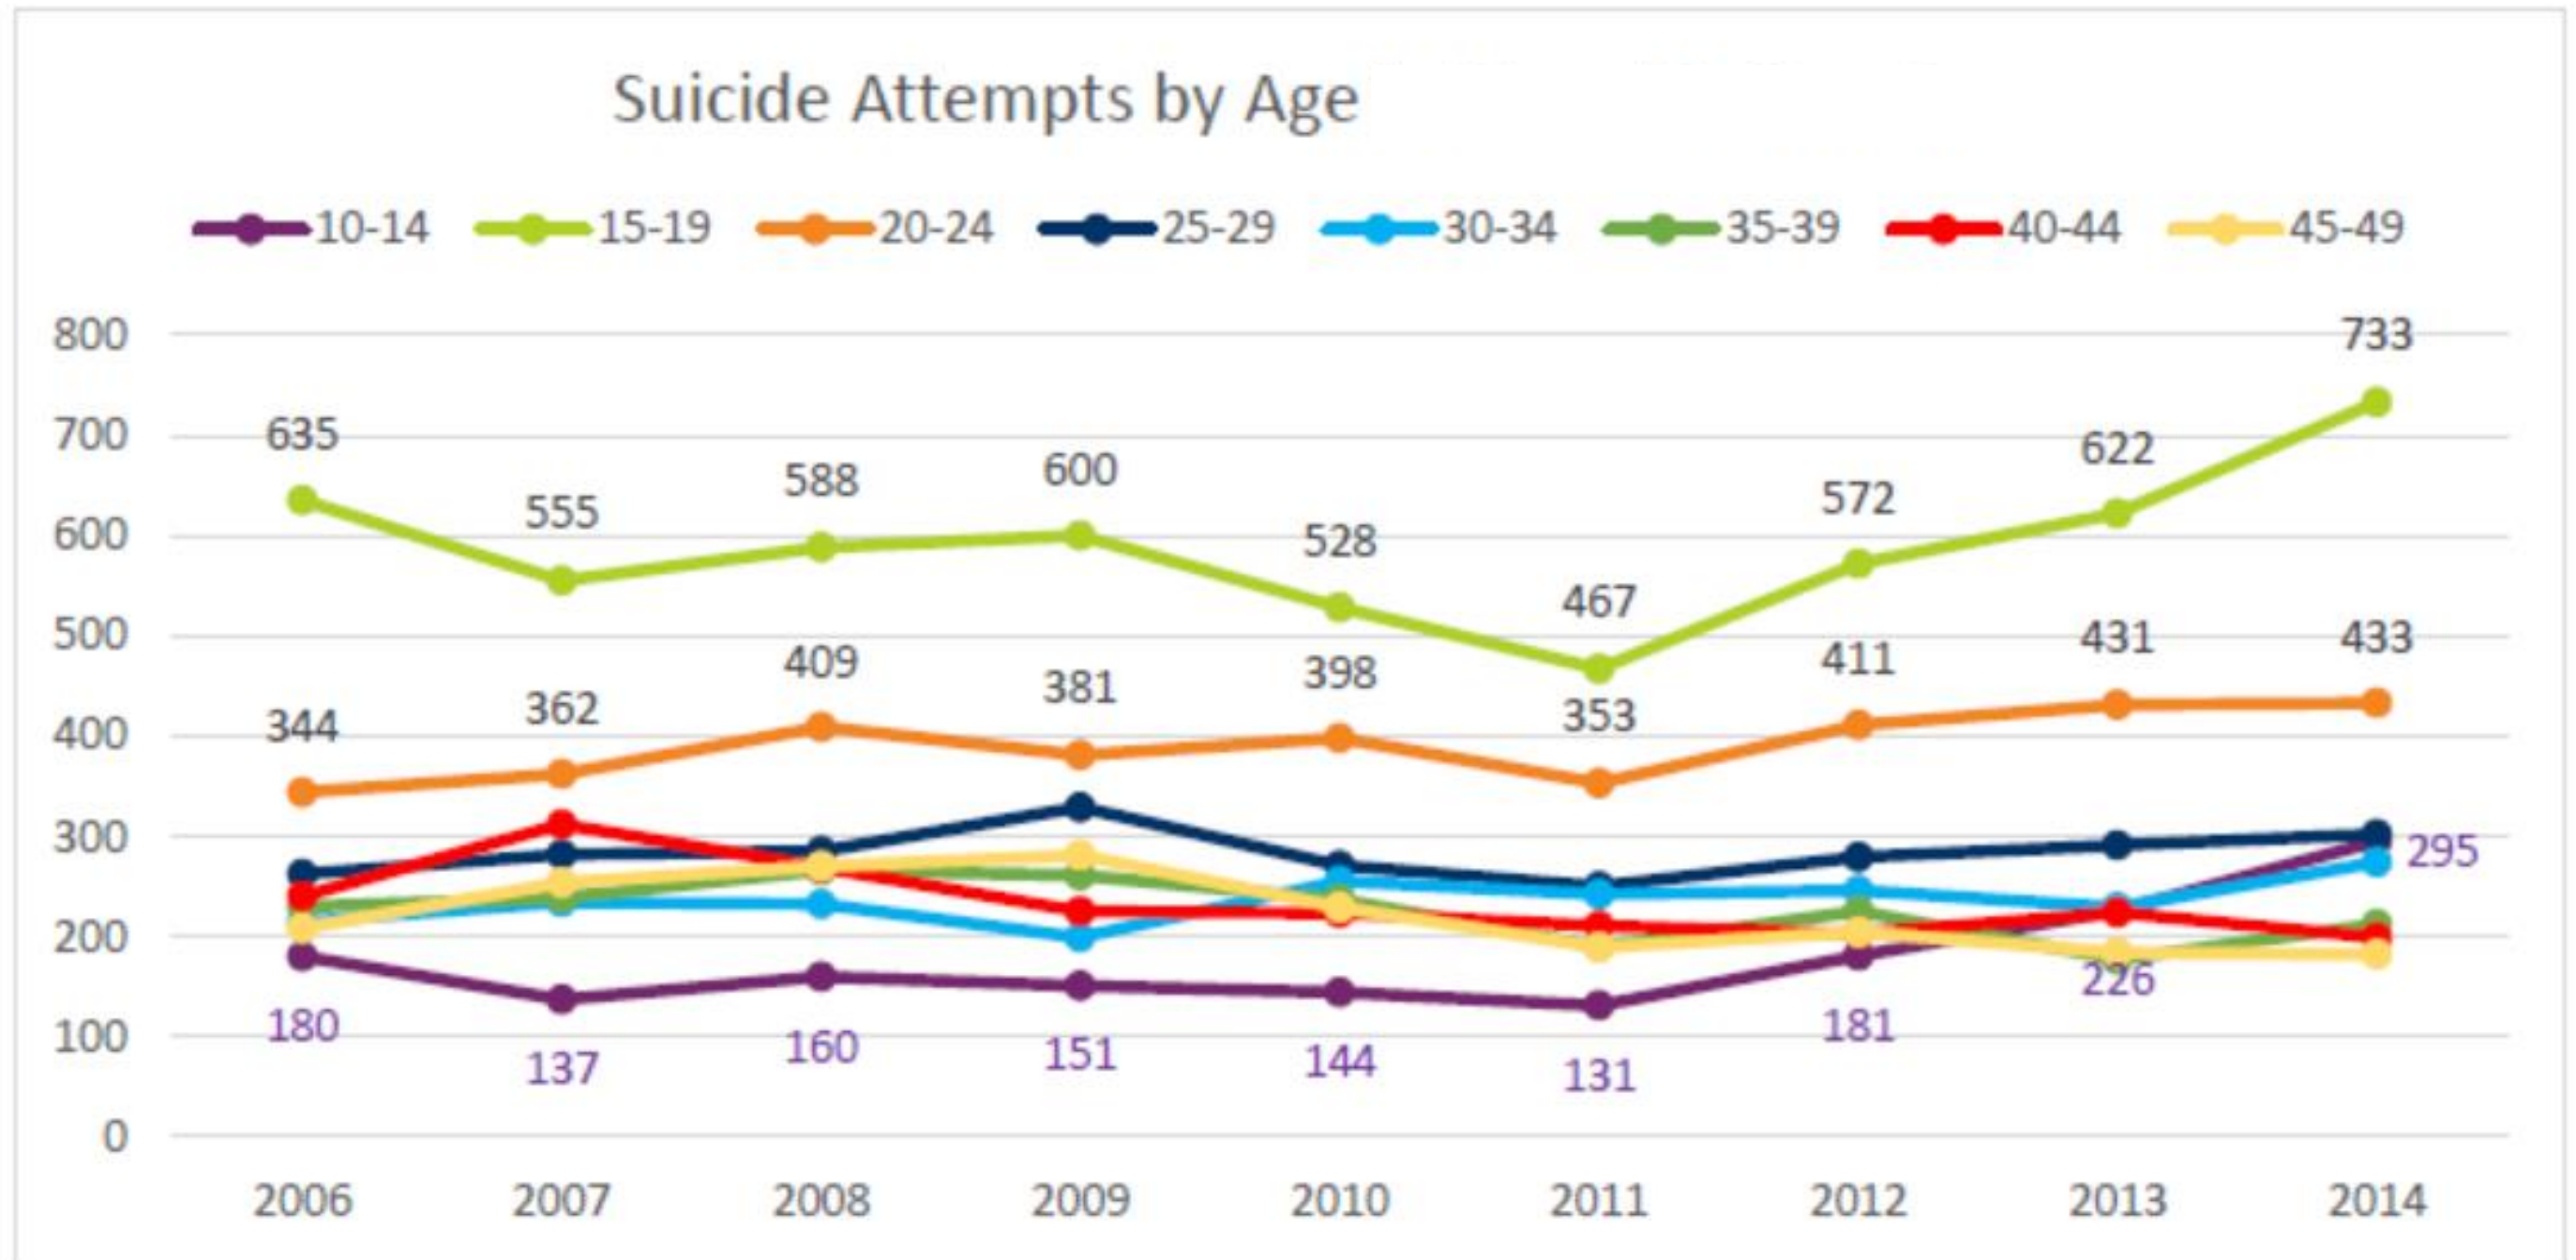

Admitted to Hospital for Suicide Attempt³

Number
Rate per 100,000 population

4,192	4,114	4,051			
41.0	40.0	39.4			

Telling a story visually-what do you take away from this?

Figure 13. Source: California Office of Statewide Health Planning and Development, Emergency Department Data

Considering Your Audience

Means of death by Age-group (2009-2019)

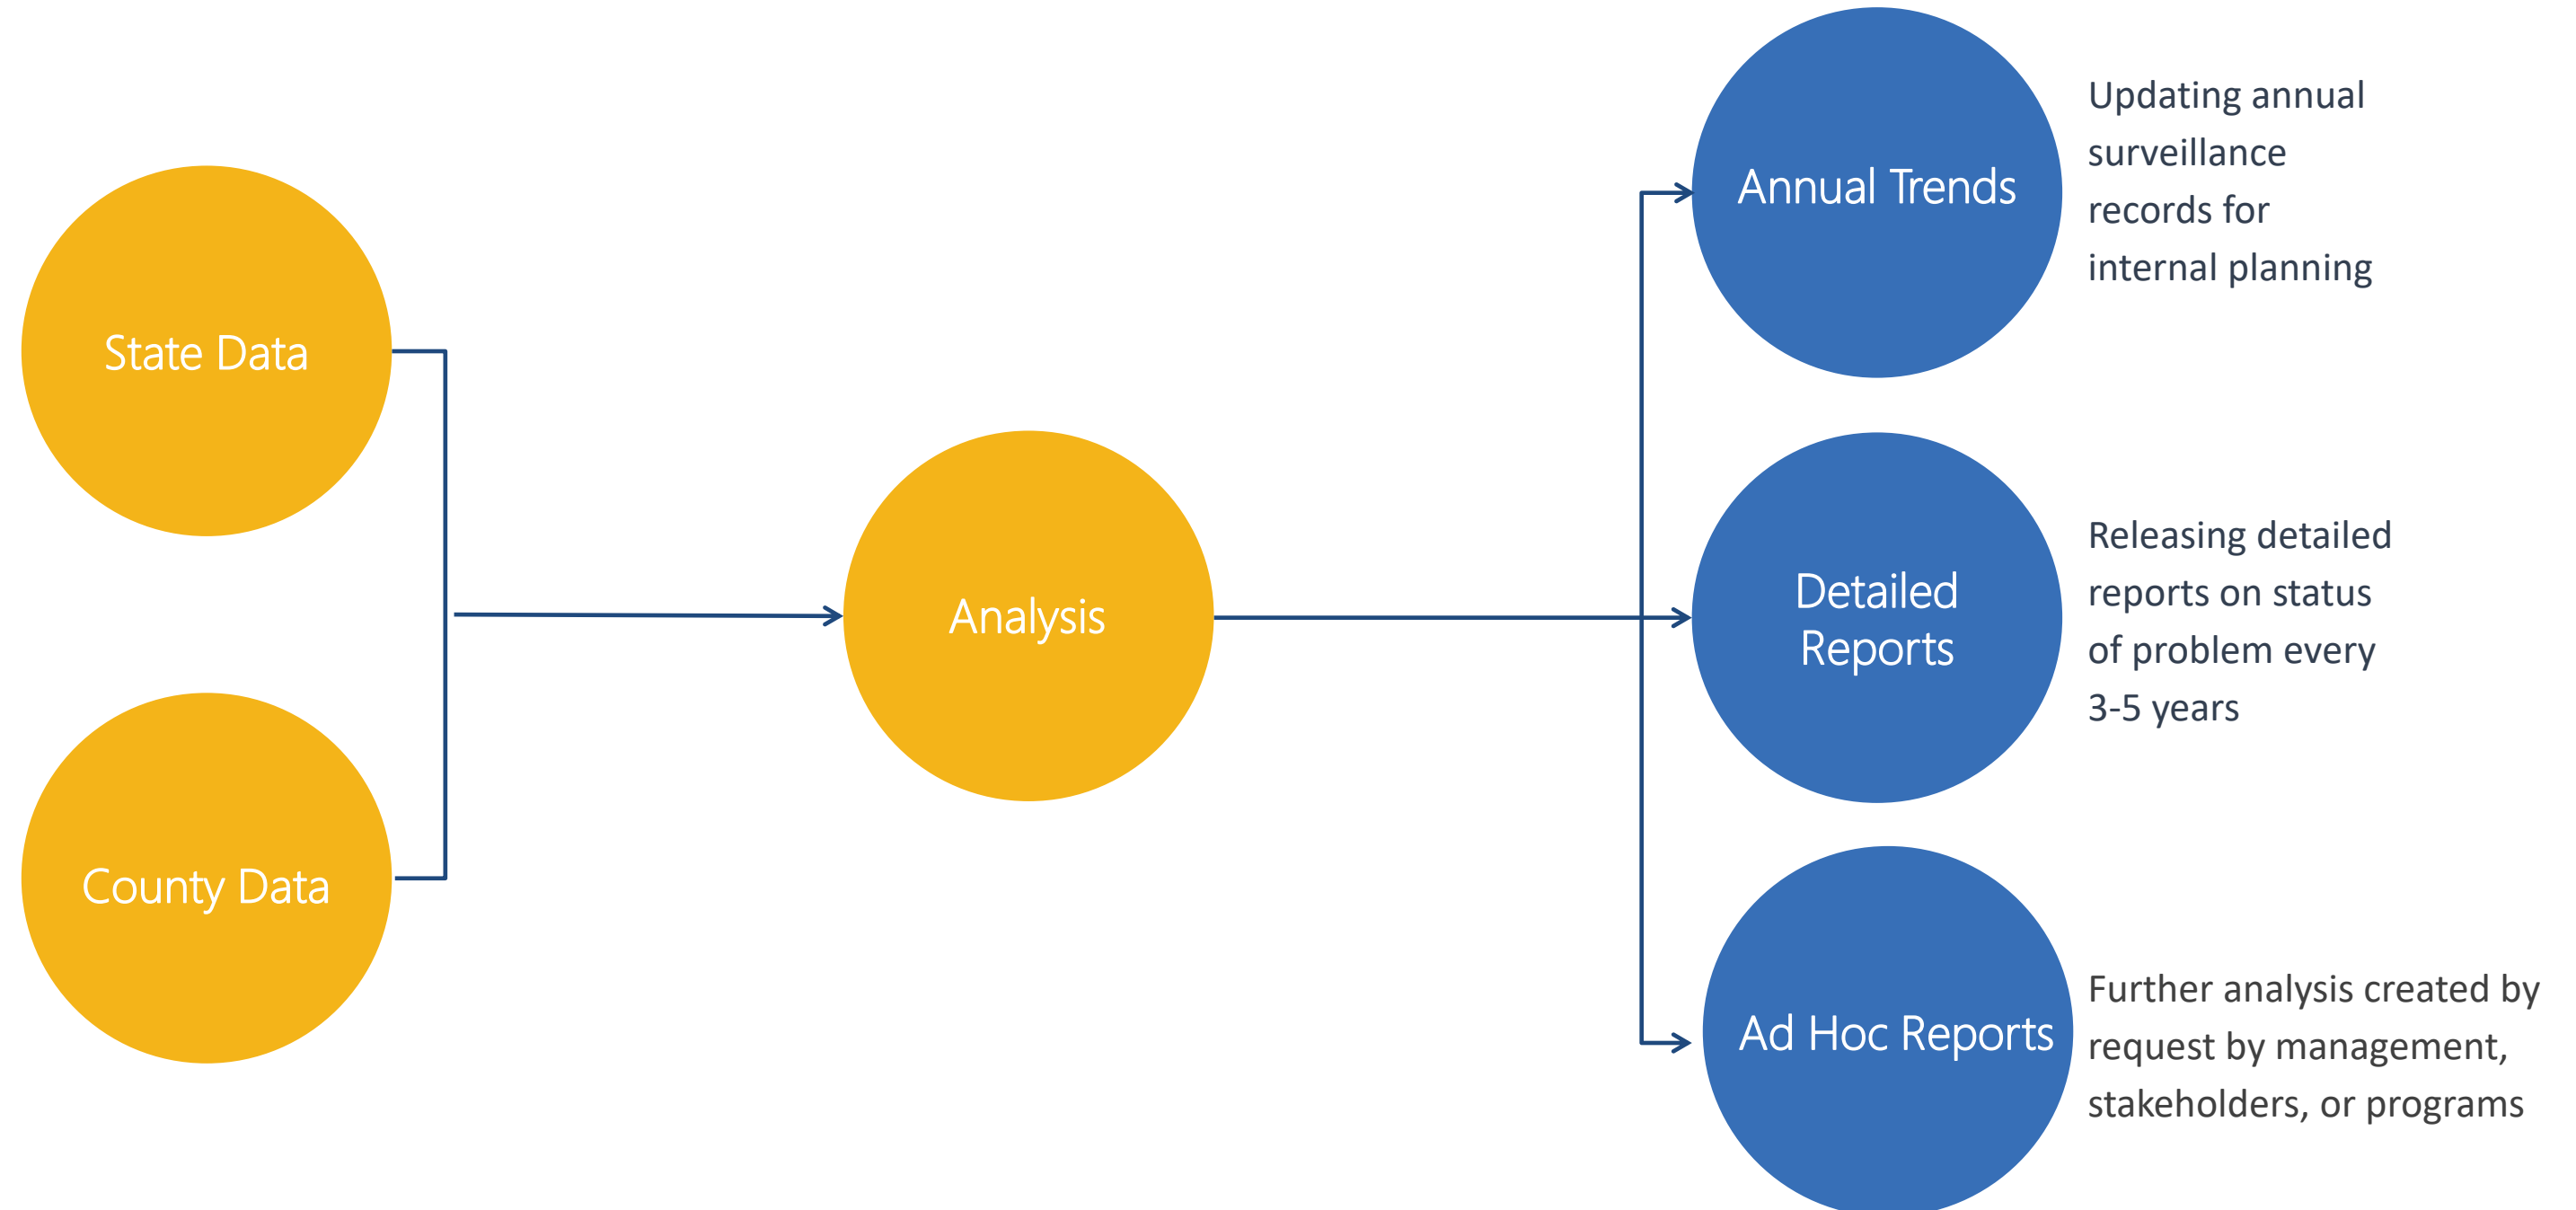

Children and Young adult (<25 yrs):
Hanging is the most common means of death followed by Firearm usage and Poisoning

Adults (26-59 yrs):
Firearm usage is the most common means of death followed by Hanging/asphyxia

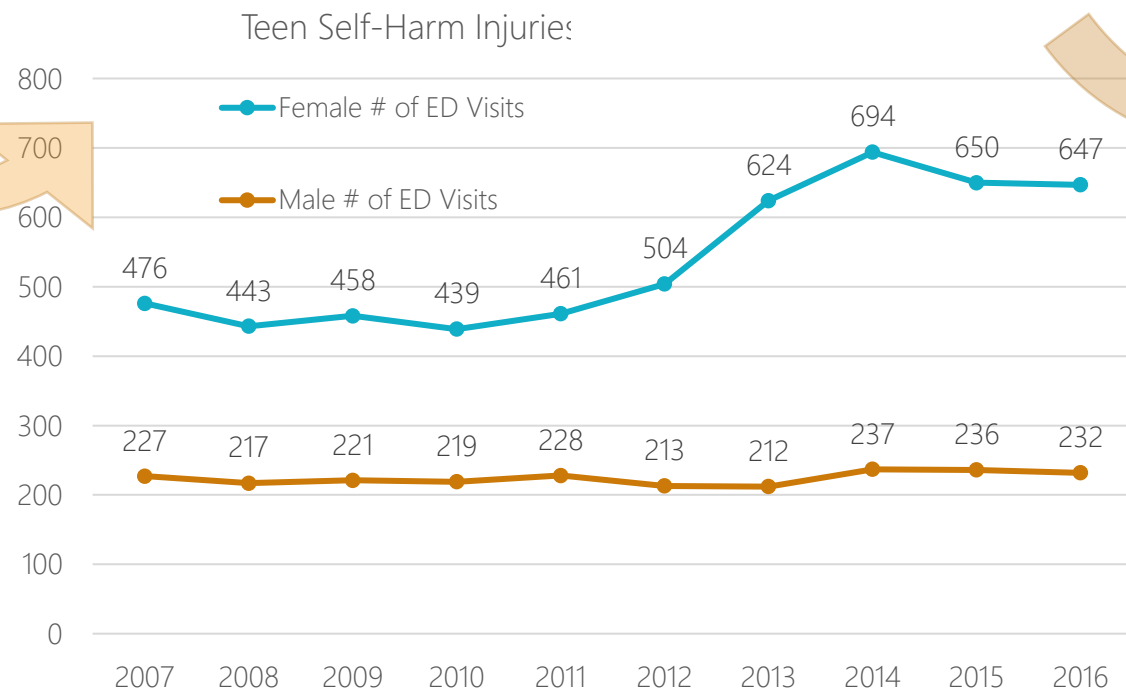

Older Adults (<60 +yrs):
Firearm usage is the most common means of death followed by other forms of Asphyxia/Hanging

Defined as continuous, systematic collection, analysis and interpretation of health-related data needed for the planning, implementation, and evaluation of public health practice, surveillance can:

- Serve as an **early warning system** for impending public health emergencies;
- **Document the impact** of an intervention, or **track progress** towards specified goals
- **Monitor and clarify** the epidemiology of health problems, to allow priorities to be set and to inform public health policy and strategies.

Example

When you identify interesting trends, you can investigate further, identifying key demographics or other covariates of interest

Sharing findings helps to generate ideas about what other factors may be involved behind trends

What's Next?

Module 2:

Describing the Problem of Suicide Part II: Suicide Ideation, Help-Seeking, Risk and Protective Factors, Resource Mapping)

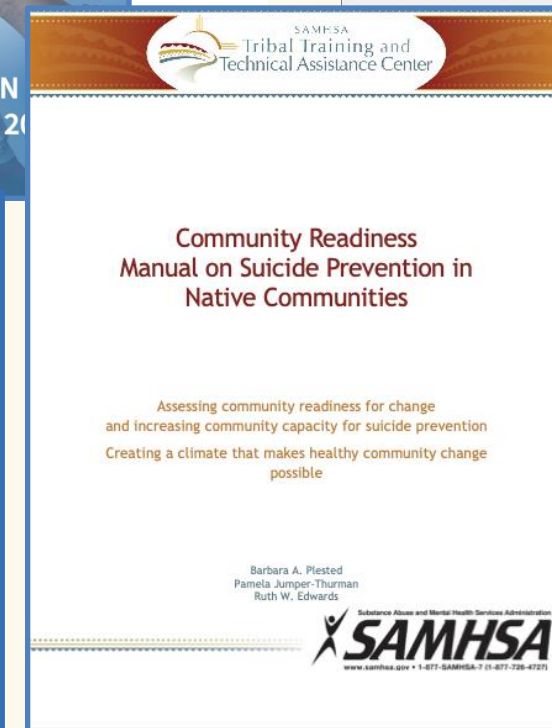

Online Module: July 21, 2021
10 a.m. to 12 p. m.

Learning Objectives:

By the end of this module, participants will be able to:

- List and understand the different methods of gathering suicide ideation, help-seeking, risk and protective factor data to define the problem and inform suicide prevention efforts in their county.
- List key questions that guide a resource mapping process
- Explain the purpose of a Suicide Fatality Review Team
